Scott Anderson Joins Polymer Resources as New Chief Operating Officer

Farmington, Conn. – Polymer Resources Ltd., a leading U.S. supplier of high-quality customized specialty engineering resin compounds, color matching services and related materials technology solutions, announced today that Scott Anderson has joined the company as chief operating officer (COO). He brings to his new position over 25 years of plastics industry experience in leading global profit & loss (P&L) functions, commercial teams, strategic pricing, product management, marketing and global commercial operations.

“Scott is a natural leader and proven plastics industry expert who knows what it takes to succeed,” said Les Klein, owner of Polymer Resources. “His track record of listening to customers and understating their needs, empowering employees, and creating a winning environment to deliver outstanding results speaks for itself. We are looking to Scott to take Polymer Resources to the next level of success by continuing our 42 year heritage of providing excellent customer service while driving profitable short-term and long-term growth. We know we are in very good hands.”

Anderson joins a company with a long history of excellent employee retention. In fact, the majority of personnel at Polymer Resources have been with the company for 15-25 years.

Anderson comes to Polymer Resources from SABIC in Pittsfield, Mass., where he was director of strategic pricing. In this position he was responsible for creating a new pricing department, mission, and implementing a new pricing strategy across the company. Before that, he served as SABIC’s P&L leader for the company’s acrylonitrile-butadiene-styrene (ABS) business unit where he led product management, sales and marketing, pricing, manufacturing, and technology operations

From 2009 to 2013, Anderson served as global sales leader for SABIC’s core resins business unit. Prior to this position he was global operations leader for the company’s Polymers Division. Before GE Plastics was purchased by SABIC in 2007, Anderson worked at GE in a number of positions of increasing responsibility for the company’s automotive business.

Anderson began his career in 1988 with GenCorp Automotive and subsequently worked at Bailey Corporation and Cambridge Industries.

He holds a Master of Business Administration degree from Michigan State University, East Lansing, Mich., and a Bachelor of Science degree in Mechanical Engineering from Kettering University, Flint, Mich.

About Polymer Resources

Headquartered in Farmington, Conn., Polymer Resources is a leading, privately owned U.S. supplier of high-quality customized specialty engineering resin compounds, color-matching services and related materials technology solutions for the electrical, medical, consumer goods, business equipment and automotive industries. Operating with an extensive list of UL approved products it is one of very few polymer suppliers that backs its compounding and color match services with a quality guarantee. The company's commitment to customer service, financial discipline, and foresight for over 42 years has made it a reliably steady resource for specialty compounds in the often volatile plastics industry. With operations in Farmington and Rochester, N.Y., Polymer Resources continues to fuel its growth through ongoing investments in its manufacturing assets and its top industry talent. The company's direct sales force and local warehousing throughout the United States enable on-time delivery and fast, local customer service anywhere in the country.
